

## **Antonio Giordano, M.D., Ph.D.**

An internationally recognized researcher specializing in the genetics of cancer, the workings of the cell cycle, and gene therapy, Antonio Giordano, M.D., Ph.D., is the President and Chairman of the Board of the Sbarro Health Research Organization, which conducts research to diagnose, treat and cure cancer, cardiovascular disease, diabetes and other chronic illnesses.

Dr. Giordano is a Professor of Molecular Biology in the College of Science and Technology at Temple University in Philadelphia, Pennsylvania and a 'Chiara fama' Professor of Pathology at the University of Siena, in Siena, Italy. Dr. Giordano also serves as the Director of the Sbarro Institute for Cancer Research and Molecular Medicine and the Director of the Center of Biotechnology at Temple University's College of Science and Technology. He is the Director of the Scientific Advisory Committee for the Human Health Foundation (HHF), an Italian charity for basic medical research that he founded with the President of the Banca Popolare di Spoleto, Giovannino Antonini. He also serves as the President of the Scientific Advisory Board for the Centro di Ricerche Oncologiche di Mercogliano (CROM), in Mercogliano Italy.

Dr. Giordano was born in Naples, Italy in 1962. He received his medical degree summa cum laude from the University of Naples, Italy and his doctorate in Pathology from the University of Trieste Medical School. He was a post-doctoral fellow in the Department of Microbiology and Immunology at the New York Medical College in Valhalla, New York and at Cold Spring Harbor Laboratory (CHSL) in Cold Spring, New York, where he studied under Nobel Laureate James Watson.

Since 1992, Dr. Giordano has been awarded 20 patents for his research. He has published 318 papers on his work in the fields of cell cycles, gene therapy and the genetics of cancer and serves on a number of editorial boards including *Cancer Therapy*, *Current Cancer Therapy Reviews*, *International Journal of Oncology*, *The Open Cancer Journal*, and *The Women's Oncology Review* (Editor-USA). In the past ten years he has been an invited lecturer at over 150 scientific meetings held within the U.S. and abroad.

His work has been funded and supported by the United States Department of Defense, Congressionally Directed Medical Program-Breast Cancer Research Program, the National Institutes of Health, The National Cancer Institute and the Commonwealth of Pennsylvania, Department of Health, Cancer Research Program,

Dr. Giordano is most recently co-editor of an oncology textbook entitled, *Molecular Pathology of Gynecologic Cancer (Current Clinical Oncology)* (Humana) published in 2007.

Dr. Giordano is a member of the American Association for Cancer Research, American Association for the Advancement of Science, The New York Academy of Sciences, The International Society for the Study of Comparative Oncology, and The Italian Tumor Society
